Maps

Based on
Intel® PXA350 Processor
with
Intel XScale® Technology

Night view:

Thanks to a special colour scheme which is specially attuned to the needs of the eyes during the darkness, you won't be dazzled if you're navigating at night.

Road map with POIs:

Detailed 2D road map presentation with points of interest: e.g. hotels, restaurants, service stations, etc. The symbols can be selected according to the driver's interest.

Arrow display:

Clear arrow display of the route with lots of important information such as names of current roads, your remaining route, your arrival time and the remaining journey time.

Touchscreen:

Everything at the touch of a button: Easy selection of the various functions such as TMC, address book, GPS info, etc.

Ease of use:

Clear menu guidance facilitates straightforward operation at all times. The menu items are self explanatory. You'll find your way easily.

Functionality:

Thought out, right down to the last detail: on entering your destination, simply type in the letters until your required place or street automatically appears.

Technical details:

- Languages: German, English, French, Polish, Dutch, Greek, Italian, Russian, Spanish, Slovakian, Czech
- 3.5 inch TFT/LC display, 16.7 million colours (24 bit colour depth)
